
Professor Mark McGurk

Personal Statement

Clinically and personally my work is highly rewarding. I gain a great deal of personal satisfaction from helping people to recover and from trying to ensure that they have as positive an experience as possible.

My career has been divided between research, teaching and consultancy. My life's work has been to simplify surgery and make it smaller and easier to bear, yet I have long been aware of the slow rate of change within the profession and of the length of time it can take for life-saving improvements to become part of standard practice. I have sought to combat this by focusing my work within teaching hospitals in order to use their resources and to maintain close contact with new generations of practitioners and consultants.

In my teaching, travelling and lecturing I interact and receive feedback from some of the most promising medical students in the world. I value this constant interaction very highly and I feel that it is a very important duty to pass on my clinical experience and research.

Professionally I am grateful that much of my work has gained recognition both in the UK and internationally and that to a large degree I have progressed towards my main career goal of simplifying surgery and making it easier to bear.

I am very aware that economic inequalities deprive many people of the top-level care that is available to a relatively small number of people. I spend time in Ethiopia each year as part of a medical charity team with Project Harar and recently started the Head and Neck Cancer Foundation.

Appointments

- Consultant, Head and Neck Service, University College Hospital, King Edward VII's Hospital and London Bridge Hospital.
- Honorary Professor, Osaka University, Japan

Government Appointment

- Member of Data Strategy Board, Shakespeare report for the Cabinet 2012 - 2013

Other appointments

- President British Association of Oral & Maxillofacial Surgeons (BAOMS) 2013

Previous Posts

- Oct 1992 - Aug 2016 Consultant, Department of Oral & Maxillofacial Surgery, Kings College London,, Guy's Hospital
- Oct 1991 - June 1992 Consultant Maxillofacial Surgeon, Queen's Medical, Centre, Nottingham
- Jan 1987 - Lecturer (senior registrar), Department of Oral & Maxillofacial Surgery, The Turner Dental School, University of Manchester

Qualifications: MD FRCS DLO FDS RCS

Undergraduate

- 1984 Bachelor of Medicine University of Sheffield
- 1976 Bachelor of Dental Surgery University of Sheffield

Postgraduate

- 1989 Doctor of Medicine, University of Sheffield
- 1989 Fellowship of the Royal College of Surgeons in Edinburgh
- 1986 Diploma of Otolaryngology, Royal College of Surgeons of England
- 1980 Fellowship of Dental Surgery, Royal College of Surgeons of England
- 1979 Fellowship of Dental Surgery, Royal College of Surgeons of Edinburgh
- 1979 Fellowship of Dental Surgery, Royal College of Physicians and Surgeons in Glasgow

Distinctions, Awards & Prizes

Undergraduate

- First award of the Bowdler Henry Scholarship by the Faculty of Dental Surgery, Royal College of Surgeons of England
- The Chairman's Cup in Clinical Studies, University of Sheffield - Awarded Proxime Accessit
- Distinction in pathology, University of Sheffield
- Qualified MB ChB with Distinction in Medicine
- Bronze Medal Final Examination Bachelor of Medicine and Bachelor of Surgery (MBChB)

Postgraduate

- 1985 Paul Toller Research Prize. Council of the British Association of Oral and Maxillofacial Surgeons
- 1988 Pathology Society Prize for presentation entitled Tenascin in fibrous dysplasia, condylar hyperplasia normal foetal, adult bone
- 1988 Thackary prize for surgery, BAOMS

Research & Surgical Interests

Head and neck cancers; head and neck skin lesions and lumps; tumours of the jaw; minimally invasive treatment of salivary gland disease (tumours, stones, ranulae, strictures, infections); mucocoeles; jaw cysts and oral lesions; facial trauma; dental extractions.

Mark McGurk: Research Output while at King's College 1992 - 2016 prior to moving to UCLH in 2017 (*The Oral & Maxillofacial Department at King's College (Guy's Hospital) did not have a research record before Professor McGurk's appointment in 1991*)

At present I am trying to reduce radiation exposure to salivary glands through X-ray examination by switching to an ultrasound technique that uses microbubbles to image the salivary glands.

Head & Neck Cancer

Mark has a long history in the practice of head and neck surgery. Since 1991 he has gathered a database and a pathology archive with over 450 consecutive patient records and specimens. The research at UCLH continues with an active program that includes the application of PET in head and neck. This includes 3D computer augmented reality that allows tumour images to be projected onto the patient in real time.

Salivary Tumours

His work has revolutionised the current practice of parotid surgery, moving away from a major to a minor procedure. The research continues to develop minimally invasive surgery for benign salivary tumours. A multi-institutional randomised study is planned.

Salivary Stones

Professor McGurk has completely changed management of salivary stones. Current treatment policy is to remove the salivary gland. In a series of 500 cases of salivary stones, 86% of calculi have been successfully extracted and only 4% of glands removed. Approximately 3,000 patients each year in the UK who would normally have their glands removed can now be treated successfully by minimally invasive means.

Day Case Oral Surgery

This involves mainly removal of impacted third molar teeth and is one of the commonest procedures undertaken in the NHS. The work has looked at efficient provision of this service and has investigated factors that predict for difficult cases and complication of surgery.

Biomaterials

An active programme of biomaterial research with a team of scientists focused on a bone replacement material is in process. This involves developing new scaffolds and augmenting their use with stem cell extracts. We provide expertise with the animal model. We are pioneering the use of 3D computer models in conjunction with rapid prototyping techniques to produce porous scaffolds tailor-made to replace bone units in the face. This technique provides immediate facial reconstruction with a bioactive material to a very high accuracy.

Courses & Conferences Provided

- International course on "Practical management of salivary tumours & stones" Oct 2003 - present
- Second International conference on "Controversies in the management of salivary disease" Jul 2010
- Salivary Gland Disease 1st International Accord on Modern Management, 4-5 July, 2008
- GP/GDP course on "Early detection and pitfalls in the diagnosis of head and neck cancer" 2006 - present
- Management of salivary stones - consultant group Apr 2002
- International course on "Distraction osteogenesis" Apr 2002
- Minor Oral Surgery in dental practice Sept 2002 International course on "Practical management of salivary tumours & stones" Oct 2002
- International conference on "Controversies in the management of salivary disease" Sept 1999

Examiner

- External examiner, BDS, University of Wales 1993 - 1995
- External examiner, BDS University of Dublin 1996 - 2001
- Intercollegiate examination board RCS 1996 - 2001
- European Association of Craniofacial Surgeons 1996
- Examiner, BDS University of London

- External examiner, FFD, Royal College of Surgeons, Dublin 2001 - present
- External Assessor, MSc in Maxillofacial Prosthetics & Technology, Manchester Metropolitan University 2001
- Regional advisor in oral and maxillofacial surgery, RCS, London 1999 - present
- External examiner, University of Cork, 2005 - 2010
- External examiner, University of Glasgow
- Examiner, oral surgery, Intercollegiate Examining Board, RCS
- External examiner, University of Newcastle

Editorial appointments

- Editor, British Journal of Maxillofacial Surgery, 2002 - 2005
- Sub-editor, British Journal of Maxillofacial Surgery 2000-02
- Editorial board, British Journal of Oral & Maxillofacial Surgery 1995 - 2001
- Referee, European Journal of Cancer 1995 - 2000
- Referee, Annals of Royal College of Surgeons of England 1998 - present
- Referee, British Journal of Surgery 1996 - present
- Referee, European Journal of Radiology 2000 - present
- Referee, Nuclear Medicine Communications 2003-
- Referee, Oral Oncology 2003-
- Member, Editorial board, Chinese Journal of Oral & Maxillofacial Surgery, 2003-
- Referee, Cancer Detection and Prevention, 2006-
- Referee, Int Journal of Clinical Practice, 2006-
- Fellow, the Higher Education Academy, 2007-

Administrative Appointments

- Regional advisor in oral & maxillofacial surgery, Royal College of Surgeons (RCS), London 1998 - 2009
- Member, British Society of Dental Technicians 1998 - 2001
- Council member, British Association of Head & Neck Oncologists 1998 - 2001 (
- Council member, British Association of Surgical Oncologists (BASO) 1999 - 2002
- Board member, DPL 2003 -
- Member, BAOMS Council 1999 - 2002
- Chairman, Chair, Postgraduate Training Standards Committee, Faculty of Dental Surgery, RCS 2004
- Professional Assessor, NCAS 2007 - 2010

Membership of Learned Societies

- Royal Society of Medicine
- British Association of Oral & Maxillofacial Surgeons
- British Medical Association
- The Association of Head and Neck Oncologists of Great Britain
- International Association of Dental Research
- British Society for Dental Research
- British Association of Otolaryngologists & Head and Neck Surgeons
- British Skull Base Society

- British Association of Surgical Oncologists
- The Society for Head and Neck Surgeons, USA
- Member, BASO National Committee
- Member, EORTC Head and Neck Group
- Member, Board of Faculty, RCS
- Member, Intercollegiate Cancer Committee, RCP
- Member, COPEUK

Other Activities

- Lead surgeon and board member of Project Harar Medical Charity (projectharar.org), providing a surgical mission in Ethiopia
- Director, Head and Neck Cancer Foundation, an independent charity founded by doctors that supports research into head and neck cancer www.hncf.org.uk
- Professor McGurk conducts master classes in minimally invasive head and neck surgery at King Edward VII's Hospital in London <http://www.surgicalcourseslondon.co.uk/index.html>
- He has recently initiated a UCL controversy series of symposia to promote a more conservative surgical approach to disorders in the head and neck.

Grants

- Comparison of unenhanced magnetic resonance (MR) and magnetic resonance (MR) lymphangiography in the pre-operative staging of cervical lymph nodes in patients with head and neck cancer. S Rankin, M McGurk, M Gleeson. Guy's & St Thomas' Charitable Foundation, GBP 50,000.
- Electronic equipment to support the use of micro sialoendoscopes in the treatment of salivary calculi. M McGurk. Friends of Guy's Hospital, 28 Feb 2001, GBP30,000.
- Microscope assisted guided interventions using intra-operative imaging (MAGI II). DJ Hawkes, DLG Hill, M Gleeson, LD Griffin, M McGurk, AJ Strong, M. Fenlon, E. O'dell. EPSRC MedLINK grant GR/R60850. Start 1 May 2001 end 30 Apr 2004, GBP229,021.
- Quality of life in HN cancer. Prize PhD studentship. Guy's and St Thomas' Charitable Foundation, GBP79,000.
- Interfacial rheology of saliva. G B Proctor, G Carpenter, M McGurk, S Challacombe. Charitable Foundation, Guy's & St Thomas' Hospital Trust. 2002, GBP51,056.
- MRC / DoH Clinician Scientist Training Fellowship 5 year SpR Training Fellowship allowing development of a multi-specialty & multi-centre research group, based at GKT (Guy's) & Oxford Universities, developing Confocal micro-endoscopy diagnostic instruments. R Cook, M McGurk, P D Robinson, 2003- 2008, GBP 518,000.
- RCS England, Department of Health funded audit project. M McGurk, T Renton, GBP24,000.
- BAOMS lingual nerve assessment. M McGurk, T Renton, GBP8,000.
- Smith Kline Beecham drug study. T Renton, M McGurk, GBP37,000.

- MDS Harris drug study. T Renton, M McGurk, GBP16,000.
- BAOMS prospective randomised coronectomy study. T Renton, M McGurk, 3,000.
- South Thames Research Training Fellowship, Development of Salivary Lithotripsy. M McGurk, M Escudier, A Coleman, GBP72,000, 1996 -1998.
- Facade. The Wellcome Trust. Sci/Art ward, I Thompson, M McGurk. GBP100,000, Sept 2004.
- Wellcome Trust IT & Website Development for Project Facade. I Thompson, M McGurk. GBP15,000, Oct 2004-06.
- Association for International Cancer Research. Partridge M, Huang X, Lyons A, McGurk M. GBP146,000, 2004.
- Head & neck cancer rapid prototyping facility. I Thompson, M McGurk. GBP238,000, Oct 2005. Guy's and St Thomas' Charity.
- Specific chromosomal anomalies in oral premalignant lesions revealed by SNP array CGH. S Thavaraj, P R Morgan, S Warnakulasuriya, M McGurk, M Gleeson. Guy's & St Thomas' Charity, GBP37,000, 2006.
- Bioactive glass implants for head and neck repair. Rosetrees Trust. Ian Thompson, M McGurk. GBP8000 2006-07.
- S E Scott, EA Grunfeld, M McGurk, J Weinman. Cancer Research UK Pilot Project Award: 'A pilot study to determine the accuracy of mouth self-examination in a high-risk population' GBP20,000, 2006-07.
- Wellcome/EPSRC Medical Engineering Centre awarded GBP11.4m . Our research group were awarded GBP1.2m for a program to "Rebuilding Faces" GBP1,781,728 . R Razavi, P Blower, S Williams, T Schaeffter, L Sevensviratne, M McGurk, et al. 2010-13.
- SurgicEye development of intraoperative SNB. Guy's & St Thomas' Charity, GBP36,000, 2012.
- KCL cancer fund GBP60,000 as CI for EORTC approved multinational Sentinel European Node Trial (SENT), final results 2015. 2008-2013.
- CR-UK awarded GBP7.3m to KCL-UCL Comprehensive Cancer Imaging Centre with SNB an component. T NG, R Razavi, P Blower, S Williams, T Schaeffter, L Sevensviratne, M McGurk, et al. 2013-2018.
- MRC, PET imaging of thyroid and parotid cancer with F-18-tetrafluoroborate, GBP98,846, 2014.
- King's Health Partners, Deep sequencing of tumour and plasma DNA for monitoring squamous cell cancer, GBP89,490, 2014.
- MRC Grant GBP98,846 - PET imaging of thyroid and parotid cancer with F-18-tetrafluoroborate, 2014-2017.
- GSTT Cancer Charity GBP18,415. Fluorescent guided sentinel node biopsy. 2014-2016.

- KHP funding GBP89,490. Deep sequencing tumour and plasma DNA for monitoring squamous cell cancer. 2014-2015.
- KCL cancer imaging fund GBP36,000. Development of navigation guided SNB. 2013-2016.
- CR-UK award GBP7.3m for KCL-UCL Comprehensive Cancer Imaging Centre. Part of bid team. 2013-2018.
- Norgine, GBP107,700.71. Development and implementation of a national database and training programme for sentinel node biopsy in early oral cancer in the UK. Sept 2016 to Aug 2017.

PhD & MSc Studentships

- Tara Renton, PhD student, Evaluation of lingual nerve injury related to mandibular third molar surgery. June 1997 - March 2003.
- Carrie Llewellyn, Prize PhD, Assessing the role of psychological factors in predicting subjective quality of life in patients with head and neck cancer. Guy's and St Thomas' Charitable Foundation, 1st applicant Prof Weinman, 2nd applicant Prof McGurk. April 2002 - April 2005. GBP79,660.
- Suzanne Scott PhD student. Investigation into the factors influencing delayed presentation of oral cancer, Nov 2002 - Dec 2005.
- Ayman Nijmeh PhD student. Delineation of intra-oral tumours using positron emission tomography, Oct 2000 - Dec 2004. Self funded.
- Samira Osailan, PhD student. Use of saliva as a monitor of recovery from ductal obstruction. Joint supervisor. Dec 2000 - September 2004. Funded by the Saudi Government.
- Isabel Sassoon PhD student. Case data driven decision support for evidence based medical practice. Sept 2012 - Sept 2015. Funded by M McGurk.
- Ambika Chadha. The application and integration of radiation-independent 3D imaging modalities to cleft lip surgery. Oct 2013 - Oct 2017. Deanery funded.
- Clare Schilling. Investigation into novel surgical technique for sentinel node biopsy and predictive markers for cervical metastases. Jan 2013 - Jan 2014. M McGurk funded.
- Uzma Murtaza. Salivary gland function in patients with ductal obstruction. Oct. 2012- Oct. 2015. Tuition fees - self-funded. Bench fees - funded by Dental Institute Endowment Fund.

Achievements

- Establishing the Oral & Maxillofacial Department Research at King's College (Guy's Hospital) No research record before Professor McGurk's appointment in 1991 Mark McGurk: Research Output while at King's College 1992 - 2016 prior to moving to UCLH in 2017
- Improvements in the surgical treatment of head and neck cancer using minimally invasive techniques and the setting up of a national training program at UCLH in 2017 to introduce SNB (sentinel node biopsy) in UK for the detection of cancer cells, thus avoiding exploratory neck surgery.

- Improvements in the treatment of benign parotid tumours and salivary gland disorders, it is now no longer necessary to routinely remove salivary glands for benign disease.
- Initiated a UCL controversy series of symposia to promote a more conservative surgical approach to disorders in the head and neck.
- Setting up a surgical master class program to disseminate our research and improve minimally invasive surgical techniques among interns and practicing surgeons. This was started at Guys Hospital and is now transferred to King Edward VII's. (Jan 2017) These classes are also organised in Paris and Erlangen for maxillofacial and ENT consultants.
- Developing a new way to treat odontogenic tumours (ameloblastoma) which preserves the mandible and maintains normal facial appearance.
- Awarded BMA Medical Book Award 2013 "Controversies in The Mangement of Salivary Gland Disease" 2013
- Developed an approach to planned operations by rehearsing with printed models of the patients. This approach became part of our research and is now integrated into an increasing number of modern practices.
- Running a European trial in sentinel node biopsy (SNB) which has led to a 70% reduction in the need for neck dissection for early mouth cancer. This work has been recognised by NICE who have advised that the test should be available throughout the UK.

Invited Lectures (shortened list)

- Marmar University, Faculty of Medicine, Haydarpasa, Istanbul, Turkey 1986: 1. Practical aspects of head and neck cancer 2. Serious complications of head and neck cancer. 3. Molecular biology and neoplasia
- Epidermoid growth factor - its clinical relevance
- University of Samson, Samson, Turkey 1986: The practical management of head and neck cancer
- Department of Oral Maxillofacial Surgery, Charles Clifford Dental Hospital Sheffield 1989: Epidermal growth factor in human saliva
- Oral and Maxillofacial Department, University of Leeds 1990: Growth factors and the oral cavity
- Postgraduate Dental Series, Sunderland General Hospital 1990: Current Research in Oral Cancer
- Division of Surgery, University of Manchester 1991: Oral Aspects of wound repair
- Alexandria University, Alexandria, Egypt 1996: Cranial Access
- American Association of Oral & Maxillofacial Surgery, Seattle 1997: Salivary Gland Lithotripsy
- The Queen Elizabeth Hospital, Birmingham 1998: First Birmingham International Multidisciplinary Head and Neck Course
- The Queen Elizabeth Hospital, Birmingham 1999: Intra-oral distraction osteogenesis
- Alexandria University, Alexandria, Egypt 1999: Distraction osteogenesis, salivary lithotripsy
- Royal Bolton Hospital 2000: International course on head and neck cancer, Complications in head and neck cancer
- BAOMS Congress 2000, Edinburgh 2000:: Salivary gland symposium, extracorporeal lithotripsy
- Greece Society of Oral & Maxillofacial Surgery, Thessalonica 2000: Salivary gland tumours 2003

- Royal Society of Medicine 2003, Double Day lecturer , Results of cancer treated at Guy's hospital 1992-2000
- GlaxoSmithKline, Talking Points in Dentistry 2003: Early diagnosis of oral cancer, revolution in the management of salivary stones, interesting cases
- British Society for Oral & Maxillofacial Pathology, British Society for Oral Medicine in association with BAOMS and BAHNO 2003 Management of epithelial dysplasia - a conservative approach
- Erlangen, Germany 2003 International workshop of diagnosis and surgery of diseases of the major salivary glands especially with new minimally invasive techniques:
- San Francisco, USA 2003: 4th international oral cancer symposium: prevention, Early detection and management UCSF continuing dental education programme
- Royal College of Surgeons 2004 Barber Surgeons,
- Darwin, Australia 2004 Royal Australian College of Dental Surgeons: 17 College Convocation,
- Thessaloniki, Greece 2004 18th Hellenic Association Congress,
- Greece 2005:10th International Congress on Oral Cancer, Crete,
- Germany 2005: Association of American Oral & Maxillofacial Surgeons Erlangen: International workshop of diagnosis & surgery of diseases of the major salivary glands especially with new minimally invasive techniques
- Japan 2005 Osaka Dental University,
- Sydney, Australia 2005 ANZH&NS Annual Meeting,
- Amsterdam, 2005, International symposium on salivary gland tumours: Present concepts & diagnosis and management,
- Alexandria, Egypt 2005 The 8th Winter School in cranio-maxillo-facial & plastic surgery
- Milan, Italy 2006: Salivary gland disease, 2nd International Course,
- Romania 2006: European Association for Cranio-Maxillofacial Surgery: UMF "Gr. T. Popa" Iasi
- London 2007 The British Society for Oral & Maxillofacial Pathology & The British Society for Oral Medicine,
- Greece 2007 Hellenic Association of Oral & Maxillofacial Surgery Annual Congress, Thessalonica,
- Alexandria, Egypt 2008, 16th AIDC,
