

SUBSCRIPTION

A total of 5 modules are available for both self-directed learning and small group discussion. One module is related to surgical Technique (module1). The remaining four contain individual patient studies (modules 2,3,4 & 5) Their content with examples is available to view on the webpage. For reasons of simplicity of delivery, the patient modules 2 & 3 have been combined as have 4 & 5. Thus there are only two patient modules to choose from with ~20 different cases in each. This reduces subscription significantly.

Please inspect the examples provided and the video clips that give a preview of each patient in the patient modules. Then select which of the modules you want to examine. There is no limit. The choice could be a single module or all 3. The Technical Module has ~ 90 min of visual content, whereas each of the enlarged patient modules (ie 2+3 or 4+5) has ~10 hrs of content.

The next step is to proceed to purchase section. The modules are positioned on a platform, HoloMedicine Spaces, that requires a Meta Quest headset to view the content. Provision of a Meta Quest is built into the subscription if requested. The **FURTHER INFORMATION** tab will direct to a secretary who will deal with your request. You will have open access to the modules selected for a period of 4 months from delivery of the Meta Quest.

The Oculus headset belongs to the subscriber.

When ordering, please indicate which module you want to review. It is recommended that the Technique module always be included with either one or both patient modules. Small group teaching can be organised on special request.

Cost per module = £100

Cost of Oculus 3S headset = ~ £300

OCULUS PROVISION

The content of the platform can't be accessed without an Oculus 3 or Oculus 3s (or more advanced Meta models). Oculus 2 is not compatible with the platform. The Platform is designed with a central "Open Room" that can be visited by anyone with a headset. It provides general information with examples of what the platform contains.

If you are in possession of an appropriate headset, then once a subscription is made, an information pack will be sent to you, that explains how to register the headset with the Platform and navigate the contents. You will be able to peruse the room at will for a period of 4 months from date of purchase.

It is anticipated that most individuals will not have an appropriate headset. This has been anticipated, and its purchase and provision can be built into the subscription. A Meta Oculus 3s headset will be forwarded to your address directly following a subscription to "Studies in ECD." The headset will come pre-loaded with software that facilitates access the platform. An information pack will also be provided to explain the headset, organisation of the platform and how to navigate the contents.

The oculus is your personal headset. It gives access to all Meta software as well as the internet. It has another function, namely entertainment.
